SBSC

Certified Cyber Security BASIC

SSF 1101 Cyber Security BASIC protects your business against the most common cyber threats. A certificate issued in accordance with this norm demonstrates that you take information security seriously and implement basic IT security within six different areas:

Computers and mobile units

Software and applications

Networks

External IT services
(e.g. cloud storage)

Authorisations

Training

SBSC

CERTIFIED CYBER SECURITY BASIC

SBSC

Cyber Security BASIC demonstrates that your organisation:

- ✓ Has **solid control** of its IT security.

- ✓ Takes information security **seriously**.

- ✓ Implements **sound protection** against the most common types of cyber threats.

- ✓ Employs **personnel** who have undergone basic information security training.

- ✓ Is in a position to **protect personal data** in accordance with the GDPR.

With Cyber Security BASIC, customers, cooperation partners and standards authorities will have greater confidence in your organisation.

These are the steps in certification:

1 Apply for certification at **kundportal.sbsc.se**

2 Complete the **Client Declaration** form to show that the requirements of the norm are met

3 We **perform an assessment** and follow-up on the responses

4 The correctness is **formally confirmed** by an authorised signatory of your organisation

5 The certificate is **valid for 3 years** – spot checks may be carried out during the period of validity

If you want to know more about Cyber Security BASIC and the requirements to be met by your organisation in order to be certified, you can read more at sbsc.se/cybersecurity.
